## Personal Information

I am a junior fullstack developer with a Diploma in Full Stack Software Development. Proficient in HTML5, CSS3, JavaScript and Python. I have over 15 years experience in guest service and hospitality. With strong communication and problem solving skills I believe I can contribute in a team as well as meeting the customer needs.

I have always been interested in tech and I am eager to gain entry to the industry and into an exciting development team where I can grow and contribute.

---

## Certification

- Digital Marketing, TEK Kompetens
- Leadership during change
- Project Management

## Portfolio Projects

1. **Gigis Yarn**, my first portfolio project with a merit grade I made with my crochet hobby. I used HTML5 and CSS3 for this project.
2. **Disney Quiz**, a quiz game I made using HTML5, CSS3 and JavaScript. The quiz has ten Disney related questions, at the end you will be presented with the total score.
3. **Storytime** is a madlibs game I made with Python. The game will present three sections in a random order and at the end of the game the story will be presented in the right order to tell the whole story.

---

## Additional information

I managed the Property Management System and the Interface at my previous work place where I have developed great skills in handling and maintaining *Oracle Fidelio Suite8* and other tech related systems and issues. I have always been eager to learn as I believe that knowledge and confidence goes hand in hand. I love to use my knowledge in combination with creativity to help solve issues.

Due to my curiosity and willingness to learn new things I have made an amazing journey within the hospitality industry. I am sure I will be able to contribute with my new learned skills in tech together with my previous skills.

## Interests

- I am a daily user in different Slack communities
- I speak Swedish, English and Chinese (Cantonese)
- I am reading thorough W3School at the moment to develop my tech skills more.
